SAKSHI SINGH
Jersey City, NJ| sakshigkp97@gmail.com |(201)-234-7418 | LinkedIn | Portfolio | GitHub

Front-End Developer with 6 years of experience building responsive and user-friendly web applications. Skilled in writing clean, efficient code, optimizing performance, and collaborating with cross-functional teams in Agile environments.

EDUCATION

Pace University (Masters in Computer Science) (Dec 2024) N ew York, USA
Ramaiah University of Applied Sciences (Bachelor of Technology in Computer Science) (Feb 2021) Karnataka, India

TECHNICAL SKILLS

Framwork/Libraries: ReactJS, Angular10+, Typescript, JavaScript (ES6+), HTML5, CSS3, jQuery, Bootstrap, Tailwind, Postman
IDE: Visual Studio Code **| Database:** MySQL, MongoDB, PostgreSQL **| Data Visualization:** Highcharts, Google Charts, R, D3.js
API Integration: Restful APIs, GraphQL, JSON, Websocket, React Context API **| Collaboration Tool:** Jira, Slack
Programing Language: Python, Java, MySQL **| Methodology:** SDLC, Agile, Waterfall **| State Management:** NgRx
Authentication & Security: OAuth2.0, JWT**| Tools:** Git, GitHub, NVM, UML, Debugging, NPM

PROFESSIONAL EXPERIENCE – *Angular, Angular Material, HTML5, Typescript, SCSS, Restful API, MongoDB, Nodejs, Git, Jira*

Doceree | Frontend Developer (*Delhi, India***)** Jan 2020 – Nov 2022

- Collaborated with Agile teams using Jira and configured CI/CD pipelines to streamline task tracking, automate deployments, and improve development efficiency.
- Developed modular and reusable components in Angular and employed state management solutions using NgRx to facilitate efficient data handling leading which improved code maintainability and faster development cycles.
- Increased unit and integration test coverage to 95%, minimizing post-deployment defects and ensuring application stability through Jest testing frameworks.
- Integrated RESTful APIs with WebSockets for real-time data communication while implementing secure OAuth 2.0 and JWT-based authentication for user login and authorization.
- Integrated WhatsApp ads and automated chat into the application, developing interactive frontend components and decision-tree-based conversation flows to enhance user engagement and streamline communication.

PROFESSIONAL EXPERIENCE – *ReactJS, HTML5, CSS, Bootstrap, Figma, GraphQL API, Context API, MondoDB, Git, Jira*

Webologix | Frontend Developer (*NJ, USA***)** Sept 2024 – Jan 2025

- Improved API performance by optimizing GraphQL queries and implementing efficient state management using React.js Context API, reducing unnecessary data fetching and improving application responsiveness.
- Translated Figma prototypes into pixel-perfect, responsive, mobile-first interfaces using JavaScript and Bootstrap, building reusable UI components and ensuring cross-browser compatibility for a consistent user experience.
- Achieved a 30% reduction in page load times through frontend performance optimization techniques, including resource minification, lazy loading, caching, code refactoring, and efficient asset management.
- Built a responsive financial portfolio dashboard using ReactJS and Redux Toolkit while integrating interactive data visualizations with D3.js and Highcharts for advanced trend analysis and customization.

PROFESSIONAL EXPERIENCE – *ReactJS, HTML5, CSS, Restful API's, MongoDB, Nodejs, Git, Jira*

Knowvia Tech Inc|Software Engineer (*NJ, USA***)** Jan 2025 – Present

- Developed scalable RESTful APIs using Node.js, Express.js, and MongoDB, implementing efficient data models, API validation, error handling, and secure integration with React-based frontend applications.
- Developed an in-house management portal to transform complex datasets into actionable insights through interactive dashboards, dynamic charts, filtering, and drill-down visualizations.
- Deployed and maintained full-stack applications on AWS, leveraging services such as EC2, S3, CloudFront, and API Gateway for scalable application hosting, asset delivery, and API management.
- Developed unit, integration, and end-to-end test suites using Jest and Cypress, covering critical UI components, API workflows, authentication, and user interactions to improve application reliability.
- Currently working on an individual project, collaborating with cross-functional teams including Product, UI/UX, Backend, QA and DevOps teams through Jira for sprint planning and GitHub for version control, code reviews, collaborative development and Agile project delivery.
